COOKIE POLICY - Comprehensive notice on the use of cookies

What are cookies?

Cookies are small text files that a web server generates and sends to a web browser. Web browsers store the cookies they receive and then send them back to the same websites on the user's next visit. Third-party cookies are cookies that are set by a website other than the one the user is visiting. Third-party cookies are created when a user visits a website that includes elements from other websites, such as third-party images, maps, sounds, specific links to web pages of other domains, etc.. Cookies are used for different purposes: performing computer authentication, session monitoring, storing information on specific configurations concerning users accessing the server, storing preferences, etc.. Information is provided below on the cookies placed through this website and on how to manage cookie preferences. For more information on cookies and their general functions, visit an informative website such as allaboutcookies.org

Examples of other technologies

Localstorage

Localstorage is a technology used to optimise navigation and does not collect data on the user's preferences (for example, it stores a code that identifies the user's session after login, to avoid the user from typing username and password on each page when accessing restricted areas)

Tracking pixel

"Tracking pixel" or "tracking code" is a small portion of code that is released by some systems and then recalled into others to track some data about the user and his/her browsing sessions or email opening, in a manner that is totally transparent to the user. The data being tracked can vary from date and time of browsing, geographical position, type of device used for browsing, up to the more complex tracking pixels that can track how much money was spent for online orders as well as other useful information for the marketing departments of the companies using them.

Plugin

Plugins are software extensions that can be loaded on a program to improve its functionality. The most popular plugins are social media plugins, which allow the users to follow a social page or profile with one click, to express that they liked a web content with one click and to share it on their social media profile, etc.

Widget

A widget is an element of a graphical user interface that displays information or provides a specific way for a user to interact with the operating system or an application, thus making it easier for the user to interact with it. The most commonly used widgets are those of social networks, which allow users to easily access social networks in a separate browser window.

These services enable interaction with social networks, or other external platforms, directly from the pages of a website. Any interactions and any information collected by the website are governed by the Privacy Policy of the Third Party that created the aforementioned technologies. In order to receive detailed information in compliance with Art. 13 of EU Reg. 2016/679 concerning the processing of personal data when using these technologies, please visit the websites of the third-party operators of these technologies.

Remember that you can also manage your cookie preferences via your browser

If you do not know the type and version of browser you are using, click on the Help button at the top of the browser window from which you can access all the necessary information. If you know your browser, click on the one you are using to access the cookie settings. Information on how to manage cookies in some of the most popular browsers can be find at the following addresses:

- Google Chrome
- Mozilla Firefox
- Apple Safari
- Microsoft Internet Explorer
- Microsoft Edge
- Brave
- Opera

elementor	elementor ltd - Israel	We use Elementor for content creation. It saves the actions performed by the user on the website. More This data is not shared with third parties.	Persistent	HTTP Cookie

All technical cookies do not require consent, so they are automatically installed after accessing the website.

Cookies or other technologies for which consent is required
All cookies (or other technologies) other than the technical ones indicated above are installed or activated following consent given by the user the first time he/she visits the website. Consent may be expressed in a general way, by interacting with the short information banner on the landing page of the website, by following the instructions indicated in that banner; or it may be given or refused selectively, according to the instructions provided in that banner. During following website visits a record is kept of the consent given as above. The user always has the possibility of withdrawing all or part of the consent previously given.

Cookies or other technologies managed by Third Parties
Cookies or other technologies operated by Third Parties are also installed through this website. Information is provided below on these cookies, as well as a link to the Privacy Policy and consent form for each Third Party.

Name	Third part	Purpose	Expiration	Type
Google Fonts API	Google Ireland Limited Gordon House, Barrow Street, Dublin 4, Ireland. Google Privacy Statement	We use Google Fonts to display fonts on our website. More This service requires the user's IP address to function properly	Immediate	HTTP Cookie
